

How to use the AIMP Localization Editor

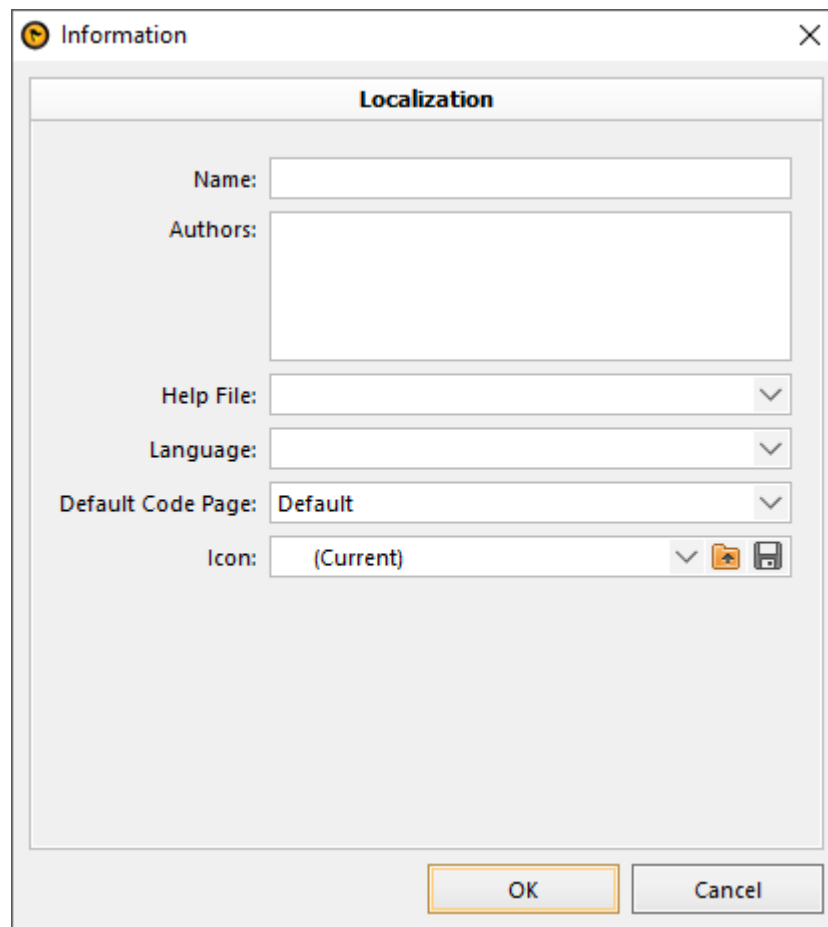

- 1) Execute the AIMPIng.exe
- 2) Create new or open an existing localization in the *.lng (for Windows) or *.xml (for Android) file format

- 3) Select localization template and click "OK"

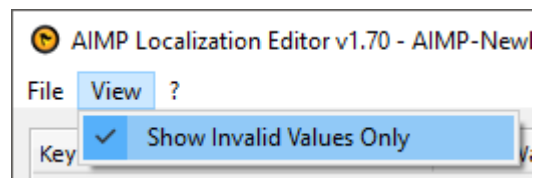

4) Fill information about the localization (*Windows version only*)

The image shows a Windows-style dialog box titled "Information" with a close button (X) in the top right corner. Inside the dialog, there is a section titled "Localization". This section contains several input fields: "Name:" with a text box, "Authors:" with a larger text box, "Help File:" with a text box and a dropdown arrow, "Language:" with a text box and a dropdown arrow, "Default Code Page:" with a text box showing "Default" and a dropdown arrow, and "Icon:" with a text box showing "(Current)" and a dropdown arrow, a folder icon, and a save icon. At the bottom of the dialog are "OK" and "Cancel" buttons.

5) Switch on the "Show Invalid Values Only" option to see "to do" entries

6) Fix all "errors" in the localization

Key	Default Value	Translated Value	
AIMP			
✖ Del_bad	Remove missing		
✖ Del_CurRecvde	Physically remove currently playing file		
✖ Key is not translated	Remove all files except selected
